

## HUBERT ZAJICEK

**Dr. Hubert Zajicek** is past-president of ASciNA. He also was a co-founder and founding board member of ASciNA, serving in many different capacities. He is CEO, co-founder and partner at [Health Wildcatters](#), a top ranked seed stage healthcare accelerator in Dallas. He previously was managing director – medical technology of [NTEC](#) (North Texas Enterprise Center) – Medical Technology in Dallas-Fort Worth, Texas and organizer of the regions' largest medical technology investment conference every year. Before joining NTEC he held a faculty position in the Department of Internal Medicine – Nephrology and Cell Biology at UT Southwestern, where he also was a post-doctoral NIH-fellow. Hubert received his Doctorate in Medicine (M.D.) from the University of Vienna, School of Medicine (1996), and his Master of Business Administration (M.B.A.) from the Cox School of Business at Southern Methodist University in 2006.

Von seiner LinkedIn page:

Love working with startups and have done so for over a decade now. Co-founded Health Wildcatters, which I also run. I specialize in healthcare companies/startups (digital health/ mHealth / medical device companies) where I have spent most of my time. I have seen pitches, read business plans, evaluated, judged and advised over thousands of startups.

Serve on several healthcare startup boards of directors & advisors and have helped startups with fundraising, staffing of boards, IP protection, regulatory & development help, strategic planning & marketing, investor relations and business development.

Started and built the MedVentures MedTech / Life Science Investment Conference in DFW. Largest MedTech Investment Conference in the Southwest whose "presenting companies" have raised over \$274M.

Active speaker, panelist and thought leader on healthcare startups, entrepreneurship, financing & healthcare #mhealth #digitalhealth

I'm a physician by training, worked & published academic research, got an MBA and now work with startups.

Specialties: startups, angel investments, venture capital, medical devices, entrepreneurship, digital health, mobile health, strategy, cross-cultural negotiations, investor relations, investment due diligence, successful grant writing, scientific papers, business plans, market analysis, acceleration
